ETHERSCAN
Kuala Lumpur
Ho Chi Minh,

Dear Sir/Madam:

AS a developer with few years of hands-on expertise garnered from successfully building and deploying web applications, I believe I have the proven development skills and passion for problem-solving to thrive in the Software Engineer role at your company.

Through rigorously coding applications from the ground up during my undergraduate degree set to complete in 2025, I have gained well-rounded experience spanning modern language like JavaScript, React and Node.js to integrate databases, craft REST APIs, enable CI/CD pipelines while applying scalable and secure architecture principles. I also excel at understanding multifaceted requirements, designing creative solutions focused on code optimization, performance and stability as highlighted by projects in my GitHub profile (<https://github.com/gymnott1>).

I now seek to leverage my analytical abilities coupled with ownership mindset to collaborate within fast-paced engineering teams. The opportunity to apply my hands-on expertise in cloud platforms, testing frameworks, frontend UI libraries as well as staying updated with the latest technologies through continued self-driven learning is invaluable to me. I hope to discuss how I can hit the ground running to support your company. Thank you for considering my application. I look forward to hearing from you.

Sincerely,
LINUS WABWIRE

ABOUT ME

A diligent developer with few years of hands-on expertise garnered through building web applications solo leveraging JavaScript, React, Node.js, PostgreSQL and modern software principles encompassing designing systems focused on security, performance and scalability. I live for the thrill of solving multifaceted problems through clean modular code backed by accountability for delivering polished apps enabled by my visualization analytical and collaboration skills – be it working solo or using GitHub in teams. I am eager to join driven teams where I can continue honing my real-world development skills spanning cloud platforms, REST APIs or UI/UX to craft innovations that positively impact lives.

Please feel free to check live project samples I have built over the years showcasing hands-on expertise via <https://github.com/Gymnott1>.

SKILLS

JavaScript (ES6+) Node.js, React, Next.js, Expo React

Python Django

TailwindCSS and MaterialUi

PostgreSQL & pgAdmin, REST APIs, AWS GraphQL

Mocha for CRDT

CICD AWS, Docker, Git, GitHub

EDUCATION

2021 - 2025

Maseno University, KISUMU

UNDERGRADUATE

- > Pursuing a Bachelor's degree in Information Communication and Technology Management
- > Currently in the 3rd year of study showcasing commitment and progress

2016 - 2020

GETEMBE SECONDARY SCHOOL, KISII

CERTIFICATE OF SECONDARY EDUCATION
